Biannual Report to Congress on the Use of Funds from the Drug Interdiction and Counter-Drug Activities Account for Support to Foreign Governments During the Second Half of Fiscal Year 2014

This report is submitted in accordance with section 1009 of the National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2013 (P.L. 112-239). Section 1009 requires that “not later than 60 days after the end of the first half of the fiscal year and after the second half of a fiscal year, the Secretary of Defense shall submit to the congressional defense committees a report setting forth a description of the expenditure of funds, by project code, from the Drug Interdiction and Counter-Drug Activities account during such half of the fiscal year, including expenditures of funds in direct or indirect support of counter-drug activities of foreign governments.” This report includes the period April 1 through September 30, 2014.

Information in this report includes the following direct and indirect support of the counter-drug activities of foreign governments:

- (1) The total amount of assistance provided to, or expended on behalf of, the foreign government;
- (2) A description of the types of counter-drug activities conducted using the assistance; and
- (3) An explanation of the legal authority under which the assistance was provided.

Table 1 reports counternarcotics support to foreign governments for the second half of FY 2014 by country, project code, amount of support, the type of activity, and the authority. The Department of Defense's (DoD) Drug Interdiction and Counter-Drug Activities account is programmed, budgeted, executed, and evaluated by project codes, not by country; the amounts provided are estimates. For convenience, the report also includes data for the first half of the FY, revised as necessary, and the cumulative total.

DoD counter-drug support for foreign governments includes a broad range of activities authorized primarily by section 1004 of the NDAA for FY 1991 (P.L. 101-510), as amended, and section 1033 of the NDAA for FY 1998 (P.L. 105-85), as amended. Section 1021 of the NDAA for FY 2005 (P.L. 108-375), as amended, authorizes support to Colombia's campaign against narcotics trafficking and against activities by organizations designated as terrorist organizations, and includes authority to take actions to protect human health and welfare in emergency circumstances, including rescue operations. Each of the activities listed for Colombia contains reference to section 1004 as well as section 1021 because section 1021 eliminates the need to differentiate between counternarcotics or counterterrorism support. Section 1022 of the NDAA for FY 2004 (P.L. 108-136), as amended, authorizes a DoD joint task force that provides support to law enforcement agencies conducting counter-drug activities to provide, subject to all applicable laws and regulations, support to law enforcement agencies conducting counterterrorism activities. Often, counternarcotics activities are supported by more than one of these legal authorities.

For the purpose of this report, all foreign (direct and indirect) DoD support is grouped into eight general categories. Following are descriptions of the categories used in the report:

Detection and Monitoring: This category consists of the detection, monitoring, and communication of the movement of air and sea traffic outside the geographic boundaries of the United States as defined in section 1004(b)(6). By law, this support is limited to the detection and monitoring of air and sea traffic within 25 miles of and outside the geographic boundaries of the United States, or surface traffic outside the boundary of the United States and not more than 25 miles within the United States if the initial detection occurred outside the United States. This support to law enforcement under section 1004 is related to, but distinct from, support provided under 10 U.S.C. § 124, which establishes DoD as the single lead agency of the Federal Government for the detection and monitoring of aerial and maritime transit of illegal drugs into the United States. These activities are supported using a variety of platforms and sensors, including Military Department air and maritime assets.

Aerial and Ground Reconnaissance: This category includes aerial and ground-based reconnaissance in support of law enforcement, as authorized under section 1004(b)(10). These activities are supported using a variety of platforms and sensors, such as forward-looking infrared, airborne radar, photographic devices, and aerial observers.

Infrastructure: Section 1004(b)(4) authorizes the establishment (including an unspecified minor military construction project) and operation of bases of operations or training facilities within or outside the United States for the purposes of facilitating counter-drug activities of DoD or Federal, State, local, or tribal law enforcement agencies within or outside the United States or counter-drug activities of a foreign law agency outside the United States. Activities authorized under this paragraph include the construction and/or maintenance of a variety of types of facilities to facilitate the operations of foreign law enforcement partners. Facilities constructed or maintained may include, but are not limited to, border crossing infrastructure, airport interdiction facilities, command and control centers, barracks and life support for counternarcotics personnel, hangars or other infrastructure to facilitate air operations, piers and other facilities to support marine operations, or training facilities, including classroom, dormitories, or dining facilities.

C4 Networks: Section 1004(b)(8) authorizes the establishment of command, control, communications, and computer networks (C4) for improved integration of law enforcement, active military, and National Guard activities. This type of support often complements the establishment of bases of operations authorized under section 1004(b)(4) and may include setting up network infrastructure (cabling, switches, terminals, etc.) or construction of transmission towers to facilitate internal, as well as cross-border communications among counternarcotics (CN) law enforcement units. Often, this infrastructure is critical to the sharing of CN-related information between headquarters and deployed forces, which can be challenging given geographical or other limitations.

Equipment: This category consists of the provision of certain CN-related equipment to a foreign government as authorized under section 1033, as well as the maintenance, repair, or upgrade of equipment authorized under section 1004(b)(2). Section 1033 authorizes support for specific equipment types, including patrol boats, vehicles, non-lethal specialized equipment, communications equipment, and night-vision systems. The provision of equipment under section 1033 requires the Secretary of Defense to certify to Congress that: the equipment

transferred will be used only by approved officials and employees of the government who have undergone background checks; none of the equipment will be transferred (by sale, gift, or otherwise) to anyone not authorized by the United States to receive the equipment; the equipment and material will be used only for the purposes intended by the U.S. Government; and that the host government has implemented a system to provide an accounting and inventory of the equipment and material provided. This certification and a counterdrug plan for each country require a notification to Congress. Equipment maintenance under section 1004(b)(2) is intended to ensure that the equipment is compatible with equipment used by DoD.

HO Planning and Oversight: This category consists of the labor and travel costs of U.S. personnel responsible for the planning and implementation of CN programs supporting foreign governments. Although this category should not be considered direct support to a foreign government, it is included in this report as the reporting requirement calls for "direct and indirect" support.

Intelligence Analysis: This category consists of analyzing information from multiple sources and combining that information into a finished product for appropriate use. Intelligence analysis is authorized by section 1004(b)(9). Examples of this type of support include the DoD tactical analysis team (TAT) program, whereby intelligence analysts are assigned to various U.S. embassies to provide all-source intelligence analysis to DoD CN personnel, law enforcement agencies, joint task forces, as well as partner-nation law enforcement and military forces.

Training: This category consists of training law enforcement personnel of foreign countries, as authorized by section 1004(b)(5). Training is carried out by a variety of U.S. instructors, including U.S. Special Operations Forces, conventional military units, and U.S. law enforcement agencies such as the Drug Enforcement Administration, Customs and Border Protection, Immigration and Customs Enforcement, or Homeland Security Investigations. These programs may consist of training in airborne and maritime/riverine interdiction operations, small-unit tactics, mission planning, demolitions, communications, and search and rescue operations. This category does not include the costs for construction of training facilities, which are captured under the "Infrastructure" category.

Transportation: This category consists of the transportation of personnel of foreign countries (including per diem expenses associated with such transportation), and the transportation of supplies and equipment, for the purpose of facilitating counter-drug activities within or outside the United States, as authorized by section 1004(b)(3). In addition to providing unique military airlift capabilities for U.S. Federal law enforcement officers, and their associated equipment outside the United States, this category also consists of providing controlled deliveries of contraband seized by U.S. law enforcement agencies to facilitate criminal investigations. These controlled deliveries are time-sensitive operations and often result in significant drug seizures and the disruption of major illicit trafficking organizations.
